Sir:

In response to the FINAL office action dated May 16, 2002,  
please amend the above identified application as follows:

In the claims:

19. (Amended) A continuous casting apparatus including a dispensing assembly for introducing granular mold flux onto the top of a slab being cast within a continuous casting mold; the assembly comprising:

- a source of granular mold flux;
- an intermediate hopper which receives granular mold flux from the source;
- one or more delivery tube assemblies interconnected with the intermediate hopper for feeding of the granular mold flux from the intermediate hopper to the top of the slab being cast within the continuous casting mold, each delivery tube assembly including
